

Toilet and shower chair for children and young people

TEAM LAZY is a toilet and shower chair that provides support for disabled children and young people when they go to the toilet. It enables them to sit unattended as much as possible, in a suitable sitting position. Spasticity or muscular weakness do not normally cause any problems in using TEAM LAZY.

A good mood

TEAM LAZY makes going to the toilet easier and encourages regular habits. Usually, everything begins to work the way nature intended it. The problems of constipation

TEAM LAZY makes it possible to sit in the right position on the toilet- leaning forward with proper foot support.

and bad appetite can be avoided. This helps to maintain a positive attitude.

The sitting position

TEAM LAZY is better than many other toilet seats, because the sitting position is natural and inclined slightly forward. This position helps to reduce spasticity. The trunk support and the back harness give the correct positioning for children with muscular weakness to feel secure when sitting unattended, and boys do not wet on the floor in this position!

Always the right size

TEAM LAZY fits everywhere - on high or low toilets, at home or away - there's almost always room for TEAM LAZY. Just fold up TEAM LAZY and pack it into the transport bag. If there is no toilet, a practical commode pot is available as an accessory.

Grows with the child

TEAM LAZY is based on a number of seats in varying sizes which all fit the same frame. As the child grows, or if several children are using the same support chair, the seat and trunk support can be changed using the same frame. In this way, TEAM LAZY is inexpensive and takes up little space in schools and hospitals, as one frame can be used with all seat sizes. It also means that the child can use the same chair and familiar sitting position for many years.

Stainless steel, no tools

TEAM LAZY is made of stainless steel. It is easy to keep clean year after year. It is important that the seat is easy to clean and assemble if it is to be used when travelling. No tools are needed to assemble TEAM LAZY.

1. TEAM LAZY fits over the toilet. 2. Takes very little room. 3. Easy to travel with. 4. Non-corrosive, for easy cleaning. 5. Transport bag. 6. TEAM LAZY fits into normalized bathrooms. 7. H-harness for extra support. 8. Pot for use when a toilet isn't available. 9. Abduction support/splash guard. 10. Forward leaning from the hip gives a stable sitting posture and the right pressing position, and counteracts spasticity. 11. TEAM LAZY is an excellent shower chair. 12. The TEAM LAZY system grows with the child, from the age of two, up to 60 kg.

Shower

TEAM LAZY is soft and comfortable for use in the shower. There are no sharp components or corners that can hurt the child. The child's back and bottom are easily accessible from all directions. TEAM LAZY fits into most shower cubicles.

Stable construction

TEAM LAZY stands securely. The sitting position relieves spasticity and offers security. The problem of agitated children tossing backwards and forwards is very uncommon with TEAM LAZY.

Although safety is excellent with TEAM LAZY, do not leave spastic children unattended.

TEAM LAZY basic model.

The basic TEAM LAZY unit is fully equipped and consists of a stainless steel frame with 75 or 100 mm castors, a seat plate of optional size, splash guard, foot rest, trunk support, push bar with back canvas, leg straps, back harness and safety strap.
